

SCADA software

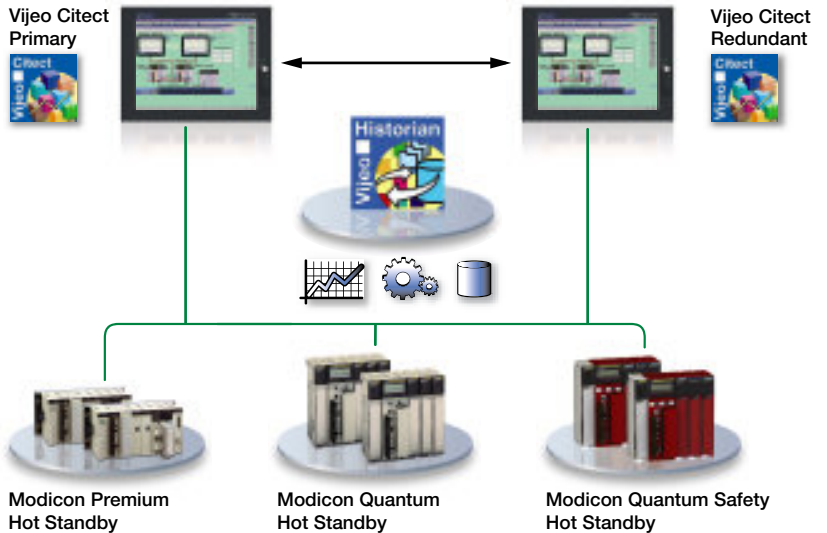

Vijeo Citect

Your *redundant* supervision

Communicative, thanks to its favoured links with Schneider Electric equipment, Vijeo Citect is the ideal partner for automation platforms under Unity Pro, Modicon Premium and Quantum Hot Standby including "Safety". Sure and reliable, it meets the requirements of stand-alone control stations as well as redundant supervision systems.

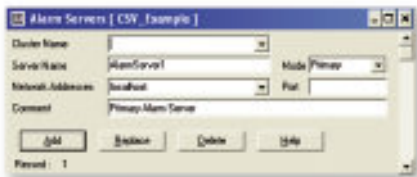

Vijeo Citect is software for data supervision, diagnostics, processing and storage to manage your production. Its integrated redundancy function enables you to optimise operation of your process. Based on automatic synchronisation of servers, redundant Vijeo Citect guarantees you permanent monitoring.

- Merlin Gerin
- Square D
- Telemecanique

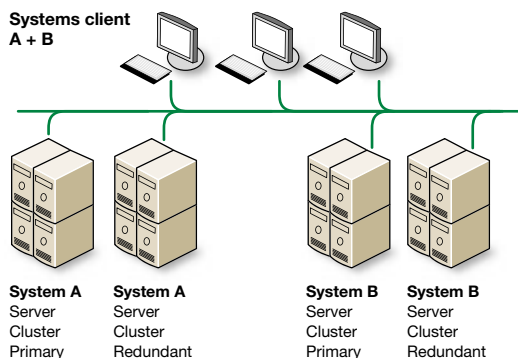

Simple and fast

- Automatically create the Vijeo Citect variables from your Unity Pro applications and set up the redundancy with some mouse clicks.

Ingenious

- The distributed architecture of Vijeo Citect servers allows locating the servers nearby to the process. Moreover the servers can be grouped per function to address the high availability applications - thanks to the clustering technology.

Everywhere, Anytime

- The flexibility of Vijeo Citect offers the perfect process visibility whatever the location of the operator stations.

Vijeo Historian, the ideal partner

- Vijeo Historian reporting and recording software synchronises with the Vijeo Citect active server without the need for prior configuration. Service continuity is therefore automatically guaranteed for your production management system.

Designed for your high-availability applications
